Abdullah Sayed, D.D.S., M.S.

DR. ABDULLAH SAYED of Pristine Periodontics & Implants has made it his mission to provide patients with the most advanced and comprehensive treatment for periodontal care, implants, and cosmetic procedures. Pristine Periodontics & Implants is about more than implants and more than periodontics. It's a commitment to excellence, to the latest treatments and techniques, and to providing the highest level of education to dental professionals in the region. This commitment to excellence has made Dr. Sayed a leader in periodontics.

Dr. Sayed's dedication extends to offering fellow dental professionals complimentary continuing education as an Approved PACE Program Provider for the Academy of General Dentistry. He is also the director of Motor City Study Club, an affiliate of the prestigious Seattle Study Club.

A Diplomate of the American Board of Periodontology, Dr. Sayed practices periodontics in the

broadest sense, from treating gum disease and rebuilding lost gum and bone to performing full-mouth rehabilitation with dental implants. To date, he has placed nearly 5,000 individual implants. While his patients include numerous professional athletes, celebrities, models, and CEOs, every patient he sees receives the highest level of care.

"Our passion is seeing the profound positive impact our work has on a patient's quality of life. Innovations in gum and bone regeneration and placement of dental implants allow our patients to smile, speak confidently, and enjoy the simple pleasure of eating," he says.

Dr. Sayed earned his master's degree in fixed prosthodontics (complex dental restorations) from the University of London and completed an advanced fellowship in implantology at Brookdale University Hospital in New York. He pursued a specialty in periodontology from the University of

Michigan, where he also teaches the next generation of periodontists in the School of Dentistry.

Dr. Sayed excels at offering a patient-centered approach to periodontal care. "We understand that periodontal disease and tooth loss can be devastating," he says. "We're here to help you rebuild your smile and reclaim your quality of life." ■
